EDUCATION

CoderHouse
10/11/2021 – 10/12/2022
React FrontEnd Developer career based in three courses:
Web Development:
Learning how to use HTML as the website structure also CSS to their styles and animations.
In the other hand we included Bootstrap as a CSS library, media queries for a responsive design and includes SASS as a CSS pre-processor. Finally, the course includes Git/GitHub for project versions management.
JavaScript: Types of data, variables and functions. I built an e-commerce shopping cart.
React: This was the last course of the career, and it contains all the functions and utilities of using React as a Javascript framework based in components including the usage of React Hooks to control their life cycle.

IGNACIO FREITAS

React Front-End Developer

ABOUT ME

Hello! My Name is Ignacio.
I am a Front-end Developer

Describing myself in a few words I would like to say that I am always looking for new challenges and I really enjoy working in teams and sharing knowledge and skills with other people.
I actually find the user experience the most interesting and creative part of the web development. So, in order to accomplish that successful interactivity within the user and the websites I studied Front-end Development.
I really enjoyed studying on some online platforms and also as an independent learner on some bootcamps.

Last but not least, I consider myself a bit perfectionist always looking for my best performance doing my work bonding some discipline with emotional intelligence.
